## WATER GETTING IN YOUR GAS TANK?

Prior to production models starting with serial numbers 64S-4460 and 64V-4685 some 1963 and 1964 Wagonaires experienced a problem with water being allowed into the gas tank through the filler neck to body panel connection. A modification which became available in October 1963 can be installed to do away with that problem. Here is the Studebaker Service Letter issued about the modification:

It is my understanding that Stephen Allen Studebaker parts has these deflectors available.
